- § Optional Graphics Display

HETRONIC

NOVA-XL

The HETRONIC NOVA family of transmitters sets the standard for today's industrial radio remote controls. The NOVA-XL was designed for applications that require multiple functions with either digital or proportional precision controls.

Typical Applications:

Like most Hetronic products, the NOVA-XL transmitter is designed to fit a broad variety of applications. It is ideal for hydraulic cranes, gantry cranes, digger derricks, material handling, tower cranes and overhead cranes.

The NOVA-XL is available with up to four dual-axis joysticks (digital or proportional) or up to eight fully-proportional paddle levers. It comes standard with a battery charger and two rechargeable batteries.

Hetronic offers the NOVA-XL in several standard versions for the most common applications. However, the NOVA-XL is also available as a customised solution. Please contact Hetronic and our engineering staff will tailor a NOVA-XL system to your needs.

The ergonomic and lightweight design allows operators to easily access control elements. The joysticks or paddle levers permit a smooth operation of the machine

The NOVA-XL has a panel-like design that provides lots of space for additional toggle switches as well as an optical graphic display.

Nova-XL with 3 dual axis joysticks

Nova-XL with 8 prop. paddle levers

Nova-XL with 6 prop.paddle levers and toggle switches

About Hetronic:

HETRONIC specialises in safety radio remote controls. Four manufacturing facilities and a network of distributors in over 45 countries provide maximum knowledge and support for our customers. We are confident that our innovative products will increase the safety and efficiency of your machines.
